Magazine article Issues in Science and Technology. Fighting Innovation Mercantilism: A Growing Number of Countries Have Adopted Beggar-Thy-Neighbor Innovation Policies in an Effort to Attract or Grow High-Wage Industries and Jobs, Making the Global Economy Less Prosperous in the Process View Test Prep - 8 Ezell, Stephen "Fighting Innovation Mercantilism" from IAFF 6141 at George Washington University. Issues in Science and Technology, Winter 2011, Fighting Innovation A growing number of countries have adopted beggar-thy-neighbor innovation policies in an effort to attract or grow high-wage industries and jobs, making the global economy less prosperous in the process. For example, despite the growing number of international ICT standards that most countries have adopted through a regular, open, industry-led standards-setting process, China is currently trying to establish its own domestic standards, several of which the country is seeking to make compulsory for products sold in China., Fighting Innovation Mercantilism A Growing Number Of Countries Have Adopted Beggar-thy-neighbor Inn.
